

(WATER MUST NEVER REACH TOP) BIOMASS HOLDER  
SAFETY TUBG DISTILLATION HEAD. CONDENSER

1. REMOVE DISTILLATION HEAD
2. REMOVE TOP FLANGE
3. LOAD BIOMASS (PRESS LIGHTLY IN)
4. ASSEMBLE AGAIN
5. START THE PUMP AND MAKE SURE WATER IS FLOWING THROUGH CONDENSER
6. COLLECT THE HYDROSOL IN A CUP OR CONTAINER

THE HYDROSOL CAN BE USED IN A SPRAY BOTTLE

7. FILL THE 1L BOILING FLASK  $\frac{1}{3}$  FULL OF WATER
8. START THE BURNER RELATIVE SLOW UNTIL WATER BOILS - THEN YOU CAN GO FULL POWER.
9. THE STEAM WILL GO THROUGH THE PLANT MATERIAL AND YOU WILL START SEEING OIL ON TOP OF THE OIL SEPERATOR.
10. AFTER ABOUT 20 MINUTES YOU SHOULD HAVE YOUR OIL - YOU CAN TRY ANOTHER 10 MINUTES, TO SEE IF ANY MORE OIL COLLECTS. IF NOT, STOP THE BURNER.
11. DISASSEMBLE, THROW OUT THE OLD BIOMASS.
12. IF YOU DO A NEW PLANT MATERIAL, RINSE ALL WITH HOT SOAPY WATER UNTIL YOU DONT SMELL THE OLD OIL.
13. DONT STRESS 😊 AND ENJOY IT.

SAFE.

PLEASE ASK IF ANYTHING IS UNCLEAR.

⊗ DISCONNECT THE SILICONE TUBING HERE WHEN CLEANING. THE METAL HOSE MAKES DISCONNECTING EASY.
